

Seminar

Linking microbiome with process performance in Anaerobic Digestion

Date	15 th October 2015
Location	Aula 6 (pasillo conserjería) ETSE, Universidad de Santiago de Compostela
Objective	The purpose of the Seminar is to present new concepts and strategies to link the structure of the anaerobic microbial community with the performance of anaerobic digestion process.

Program

16:00 – 16:10	Introduction
16:10 – 16:40	Willy Verstraete (Ghent University, Belgium) “What is Microbial Resource Management?”
16:45 - 17:15	Belén Fernandez (GIRO. IRTA, Barcelona, Spain) “Microbial population profile in anaerobic digesters with high TAN content”
17:20 – 17:50	Fons Stams (Wageningen University, The Netherlands) “Syntrophs, a crucial minority in anaerobic digestion”
17:55 – 18:30	Discussion
